Award-winning Smart-UPS

APC® Smart-UPS™ (Uninterruptible Power Supply) solutions are trusted by millions of IT professionals to protect their critical data and equipment from business downtime by providing clean, reliable power. The standard model of the most popular APC Smart-UPS has been considered the benchmark for server and storage reliability and manageability.

The right UPS for your business

Small businesses don't need the same power output as an enterprise business and vice versa. You need to find the right APC Smart-UPS to fit the needs of your workforce and keep your IT infrastructure secure.

APC Smart-UPS SMT series

The SMT series provides intelligent and efficient network power protection for medium-sized businesses. It's ideal for servers, POS, routers, switches, hubs and other network devices.

Key features

- **Switched outlet group**
Controlled separately from the UPS for discrete reboot of hung devices, sequenced On/Off and non-critical load shedding.
- **Configurable, multi-lingual display**
Provides UPS status and key information at-a-glance. Easily customize your menu display with or without software installation.
- **Rack-mount rails**
Securely install your IT rack with the provided rail kit for 2.2kVA and 3kVA models.
- **Emergency Power OFF (EPO)**
Remotely shut-off your UPS in the event of a fire or other emergency (2.2kVA and above).

APC Smart-UPS SRT series

The SRT series offers industry-leading power factor maximizing UPS density. It's capable of supporting loads from 1kVA to 10 kVA in a rack/tower convertible chassis. The SRT series provides value to customers with demanding power conditions.

Key features

Best-in-class power density

More real power in watts, 0.82 pf on the 2.2 kVA, 0.9 pf on the 1kVA, 1.5 kVA, and 3 kVA, 0.85 pf on 5 kVA, Unity on 6 kVA – 10 kVA units.

High efficiency Green Mode

Achieves 97% efficiency, which helps save utility and cooling costs without compromising performance or reliability. Energy Star® compliant.

Graphical LCD display with multicolor backlight

Intuitive interface provides detailed and accurate information with ability to configure locally.

Intelligent battery management

Temperature-compensated charging extends battery life and algorithms recommend your replacement date. The UPS informs the users which batteries need to be replaced and auto detect when additional battery packs are added.

Built-in energy meter

Measure energy use and display UPS efficiency for easy energy tracking.

Battery-less operation

Immediately help protect equipment when power returns after a complete discharge of the battery.

Three-year warranty on electronics

APC Smart-UPS SMX series

The SMX series is designed for larger businesses and enterprises. This series provides best-in-class reliability, certified energy efficiency and connectivity to keep your business running even through power outages.

Key features

- **More active power**
With a 0.9 power factor, you can reduce energy costs by up to 30%.
- **Switched outlet group**
Controlled separately from the UPS for discrete reboot of hung devices, sequenced On/Off and non-critical load shedding.
- **Smart battery management**
Innovative, dynamic recommended battery replacement date indicator.
- **Extended-range AVR**
Provides enhanced brownout protection, boosting incoming voltage up to 30% without using battery power.
- **Configurable, multi-lingual display**
Provides UPS status and key information at-a-glance. Easily customize your menu display with or without software installation.

APC Smart-UPS On-Line

Finally, the Smart-UPS On-Line provides proven performance with the world's largest installed base of single-phase, double-conversion products: Rackmount and Tower SRT 1 kVA – 10kVA.

Key features

- **Embedded network management card**
Remote monitoring and control of the UPS and the environment via ethernet connection to free up the SmartSlot™ for customers to add accessories.
- **Switched outlet group**
Controlled separately from the UPS for discrete reboot of hung devices, sequenced On/Off and non-critical load shedding.
- **Emergency power off**
Remotely turn off your UPS in the event of a fire or emergency.
- **Communication ports**
Serial, USB, ethernet and SmartSlot are available for network accessory cards.
- **Communication protocols**
Protocols included Modbus serial, USB PowerSummary, HTTP, SNMP and Telnet.

Proactive power management with EcoStruxure IT

APC's EcoStruxure IT is a digital platform that transforms the way your IT and data center teams manage critical IT infrastructure from anywhere, at any time.

EcoStruxure sets a new standard for proactive insights on your critical assets. It allows you to see the health and availability of your IT environment and gives you the opportunity to deliver actionable real-time recommendations to enhance performance and minimize risk.

Key benefits of EcoStruxure IT

Global visibility

See across your hybrid ecosystem from one tap access from your smartphone or any device, anywhere.

Vendor-neutral architecture

Collect data from all your devices, regardless of vendor, including device information, smart alarms and monitoring.

Risk mitigation

Gain foresight into potential risks by leveraging benchmarks and analytics with EcoStruxure's data lake.

Simplified management

Deployment is simple through a convenient subscription model for environments of any size.

Focus on business growth

APC's award-winning Smart-UPS™ solutions are designed to ensure your servers, storage and network power are protected. This means you can focus on your business growth instead of business downtime.

Talk to an Insight specialist today to learn more and equip your business with the right APC® Smart-UPS solution for you.

About Insight

Insight Enterprises, Inc. is a Fortune 500 solutions integrator helping organizations accelerate their digital journey to modernize their business and maximize the value of technology. Insight's technical expertise spans cloud and edge-based transformation solutions, with global scale and optimization built on 35 years of deep partnerships with the world's leading and emerging technology providers.
