

Corporate fact sheet

Autodesk is changing how the world is designed and made. Our technology spans architecture, engineering, construction, product design, manufacturing, media, and entertainment, empowering innovators everywhere to solve challenges big and small. From greener buildings to smarter products to mesmerizing blockbusters, Autodesk software empowers innovators to design and make a better world for all.

But we're restless to do more. At Autodesk, we don't believe in waiting for progress, we believe in making it—by combining technologies, unleashing talent, unlocking insights, and empowering our customers to find solutions to the challenges we face today. Our software provides customers with the right tools to work, the ability to think flexibly, and the power to transform what actually needs making.

Autodesk is committed to advancing a more sustainable, resilient, and equitable world with our technology, philanthropic investments, education initiatives, business operations, and employee programs. We donate software to eligible nonprofits, startups, and entrepreneurs that are using design and manufacture approaches to accelerate positive outcomes across industries. We also prepare the next generation of innovators by providing students and educational institutions globally with increased, equitable access to professional software, in-demand skills training, lifelong learning programs, communities, and industry insights.
