Leading IT solutions for federal agencies

For decades, Cisco has partnered with federal agencies to address mission critical communications and security requirements. Cisco's advanced networking equipment and solutions, delivered by Insight Public Sector, put your agency's security and success at the forefront.

Government agencies face multiple challenges with cybersecurity, including:

- Maintaining security while transitioning to a hybrid cloud environment
- Ensuring consistent cybersecurity measures across agencies and vendors
- Supporting hybrid work while minimizing threats
- Implementing security measures for smart buildings and IoT devices
- Maintaining a skilled IT workforce across government agencies
- Managing the collection and use of sensitive data

Cisco's integrated platform is a trusted security partner. With advanced, comprehensive products and services — like Zero Trust security, secure firewall and unified communications manager — Cisco unlocks the full potential of federal agencies, so you can do your best work.

Why Cisco for federal?

Insight and Cisco are your go-to partners for federal security. Specializing in networking, collaboration, data center, hybrid cloud, security and service provider technology, Cisco:

- Supports mobile and hybrid work environments.
- Optimizes cloud and hybrid cloud infrastructure.
- Reduces operational cost and complexity.
- Helps your agency comply with mandates.
- Supports robust Zero Trust security.

Insight supports the entire Cisco portfolio today and holds all Cisco Master Specializations including

- Route/switch
- 5G
- Identity Services Engine
- Software-Defined Access
- DNA Center
- SD-WAN
- UCS/compute
- WiFi/WiFi6/6E solutions

Embrace flexibility

When building a secure hybrid work environment for your agency, Cisco has you covered. Government agencies that embrace modern and flexible work environments enhance service outcomes — all while bringing lasting change in their agencies and communities.

Cisco enables flexible work from any location — meaning your agency can:

Deliver reliable access to critical services

Empower innovation

Enhance end user experience

Improve collaboration

Insight is your trusted Solutions Integrator. With broad and deep services capabilities, Insight constructs customized end-to-end solutions to meet mission requirements using Cisco and complementary technologies. Insight offers ideation to solve specific problems, proof of concepts, pilots, architecture and design, large scale/global deployment capabilities, and staging and logistics.

FedRAMP authorized security solutions

When building a secure hybrid work environment for your agency, Cisco has you covered. Government agencies that embrace modern and flexible work environments enhance service outcomes — all while meeting critical security requirements and mandates.

Cisco Unified Communications Manager (UCM) Cloud for government	Cloud-based collaboration solution offers end-to-end encryption for a consistent and unified experience.
Cisco Duo security for government	Reduce risk, simplify IT operations and comply with executive guidance on Zero Trust security.
Webex® by Cisco for government	Connect your agencies with messaging, meetings and calling — from anywhere.
AppDynamics® GovAPM solutions	Manage application and drive cloud adoption without compromising on security.

What's next for FedRAMP solutions at Cisco?

Cisco Umbrella® for Government and Cisco Meraki™ for Government have both achieved In Process FedRAMP Moderate authorization status. This means government agencies that rely on FedRAMP certifications for solutions can soon utilize these comprehensive cloud-based security solutions.

Cisco Umbrella for Government

With comprehensive features, Cisco Umbrella for Government is your solution to enhance cybersecurity.

Modernize and connect your agency with a cloud-first platform to help you:

- Streamline deployment, management and use through a single-browser interface.
- Protect users and devices with Umbrella cloud-delivered DNS-layer security.
- Enable seamless expansion as needed without sacrificing performance or reliability.

“This solution is set to significantly up-level government cybersecurity, offering comprehensive security that meets the needs and compliance requirements of government organizations.”

— Shailaja Shankar, SVP Engineering, Cisco Security Business Group

Cisco Meraki for Government

Cisco Meraki for Government is your complete solution. The cloud-native platform provides secure and customizable networking solutions for government agencies.

With Meraki, your agency can:

- Simplify deployment and management of network configurations.
- Utilize the same security principles across networks without compromising on network and security features.
- Manage networks remotely from a centralized dashboard through automation and Zero Trust provisioning.

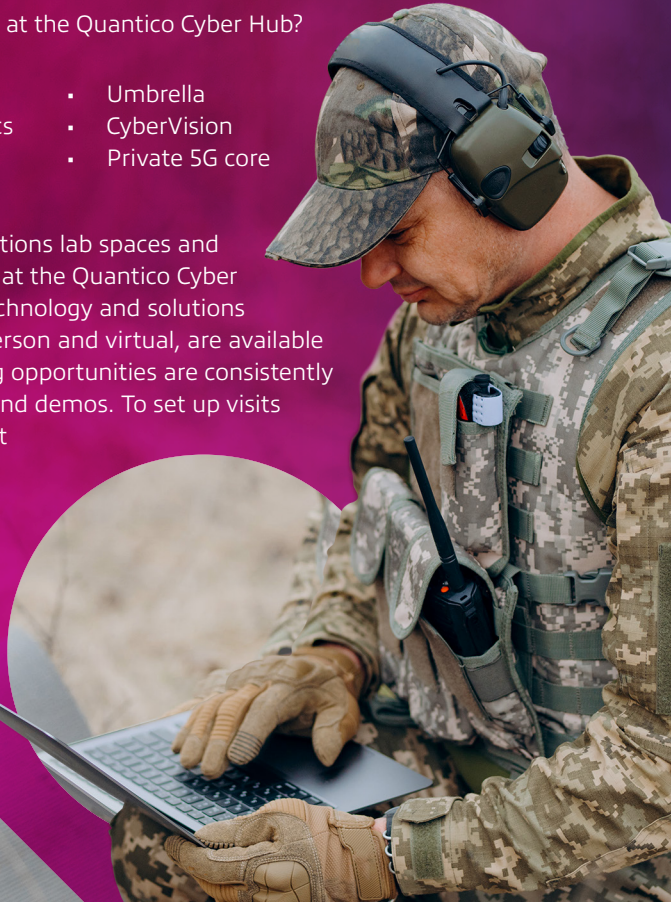

Better together

Cisco has partnered with Insight at the Quantico Cyber Hub to help create IT solutions that solve critical security and connectivity problems in the public sector.

Which solutions are featured at the Quantico Cyber Hub?

- Cybersecurity ISE
- Secure Network Analytics
- NGFW
- Secure Workload
- Umbrella
- CyberVision
- Private 5G core

Come see Cisco working solutions lab spaces and meet with specialists on-site at the Quantico Cyber Hub to discover advanced technology and solutions capabilities. Visits, both in-person and virtual, are available by appointment and learning opportunities are consistently available through seminars and demos. To set up visits and/or demos, please contact cyberhub@insight.com.

About Insight Public Sector

Today, technology doesn't just support your organization; it's a central avenue for serving the public. At Insight Public Sector, we help you navigate the complex challenges to develop fresh solutions and processes. We'll help you manage today's priorities and prepare for tomorrow's needs.
