

# CYBER RISK INSURANCE REQUIREMENTS

## Want to lower your cyber insurance premium?

5 common security requirements and the ESET solutions that support them.

### Multi-factor authentication

A multilayered security system that grants users access to a network, system or application only after confirming their identity with more than one credential or authentication factor.

**SOLUTION:**  
ESET Secure Authentication  
(stand-alone product)

### Endpoint detection and response (EDR)

An endpoint security solution that continuously monitors end-user devices to detect and respond to sophisticated cyberthreats like ransomware and zero-day vulnerabilities.

**SOLUTION:**  
ESET Inspect, available in  
ESET PROTECT Enterprise

### Endpoint protection

An enhanced antivirus technology that combines artificial intelligence, behavioral detection, machine learning algorithms and exploit mitigation to anticipate and prevent both known and unknown threats.

**SOLUTION:**  
Endpoint protection, available in  
ESET PROTECT Entry,  
ESET PROTECT Advanced,  
ESET PROTECT Complete,  
ESET PROTECT Enterprise

### Cybersecurity awareness training

A program that teaches internet best practices and educates employees about phishing, online scams and other threats in order to improve security.

**SOLUTION:**  
ESET Cybersecurity  
Awareness Training

### Email security

A security solution designed specifically to protect users and their email, the most exploited threat vector, with multilayered antispam, anti-phishing and host server protection technology.

**SOLUTION:**  
ESET Mail Security, available in  
ESET PROTECT Complete
