

Red Hat Ansible + Palo Alto Networks Next-Gen Firewall

Leading solutions to support your biggest plans

Business challenge

Constantly changing environments have forced organizations to adopt more agile methods for managing these shifts. Whether innovating or maximizing opportunities, automation and security have become key players in this response.

Red Hat® Ansible® and Palo Alto Networks® Next-Generation Firewall (NGFW), available through Insight, are the perfect duo to help your organization respond to these fast-changing situations. Because NGFW is already available as part of Ansible's core modules, it can be accessed and deployed quickly to secure your most critical environments.

Our solution

Together, Ansible and NGFW create a complete automation platform, helping you free up time to focus on larger business initiatives. By using these joint solutions, your organization can reduce the time needed for IT infrastructure management and cybersecurity oversight from hours to seconds. Learn more with a free Ansible readiness workshop and lab session.

Here's how:

Support growth with scalable deep learning solutions.

Maintain oversight with a system of record.

Reduce manual work by leveraging automation.

Eliminate human error with operations defined as code.

Benefits

- + Reduce errors and improve security posture.
- + Automate security for time savings.
- + Leverage repeatable processes.
- + Integrate with larger, multi-domain workflows.
- + Maintain appropriate levels of governance.

Our partners
