

# Why Upgrade to Windows 11?

Everything you need to know before  
switching to Windows 11

Insight 

 Windows 11

## Partner with Insight for Windows 11 devices

Your devices are crucial to your continued business operations. Devices facilitate communication, collaboration and productivity. Business can't be done in today's era of work without devices.

However, it's challenging for any size organization to maintain and support an entire fleet of devices. Managing multiple vendors and fulfilling end user needs takes time and resources.

## Support for the complete device lifecycle

Insight offers simplified support for the entirety of your device's lifecycle. All from a single partner. When you partner with Insight you:

- Ensure maximum uptime and device lifespans.
- Bring device choices to employees without adding complexity.
- Eliminate the time and hassle of managing multiple vendors.
- Improve the end-user experience, from refresh to support.
- Drive down device costs and employ modern management.

# Why Insight?

As a global systems integrator, Insight helps you maximize control of your fleet of devices to ensure optimal cost and performance outcomes. Insight brings expertise, resources and support to each phase of the device lifecycle so you can stay focused on your business

# Welcome the next era of work with Windows 11.

Today's businesses are looking for centralized solutions to the challenges of hybrid work — solutions that make their organization more secure, agile, collaborative and manageable. That solution is Windows® 11.

Windows 11 pushes the boundaries of what you can expect from your operating system. With features designed to improve security, simplify device management and deployment, and enhance collaboration and productivity, Windows 11 has everything you need for your hybrid workforce.

**83% of  
employees**

identified a hybrid work  
model as being optimal in  
the future.<sup>1</sup>

As you adapt to and optimize hybrid work, it's important to have the right solutions to keep your teams productive and secure.

Keep reading to discover how Insight and Windows 11 can upgrade security, manageability and collaboration for your hybrid teams.

## Advanced security from chip to cloud

Security is one of the top priorities facing IT teams today. The rapid growth of hybrid and remote work has reinforced the need for advanced protection from a growing number of cyberattacks.

Windows 11 offers a modern security solution built with Zero Trust principles to deliver total protection — anywhere. With Windows 11, **hardware and software** work together to keep you secure, from your devices to the cloud.

Approximately **80% of security decision-makers** say that software alone is not enough protection from emerging threats.<sup>2</sup>

# Key Windows 11 security features

Windows® 11 offers layers of protection between the hardware and software to keep your device, identities, data and more protected from modern threats.

## Key features that safeguard your business include:

### Hardware security

Windows 11 PCs protect hardware at the core with the latest TPM 2.0 technologies, silicon-assisted security and identity protection.

### Operating system security

Windows 11 comes equipped with advanced encryption and data protection, system security, and safeguards against evolving viruses and cyberthreats.

### Application security

The rich application platform of Windows 11 enables developers to build in security from the ground up to protect against malware and breaches.

### User security and privacy

Easily safeguard end users' data and identities with credential protection and passwordless features. Windows 11 also offers new privacy controls for location, camera and microphone.

### Cloud management

Finally, your cloud services stay protected with multiple layers of protection for security, privacy and control.

## Simplified manageability and deployment

With more employees working in more places, your IT teams need to manage more devices with more flexibility than ever before. Windows 11 improves upon previous deployment and management features while keeping the same familiar tools and processes.

### Manage devices anywhere

Easily support your employees from anywhere with cloud solutions like Azure® Active Directory and Microsoft® Endpoint Manager.

### Zero-touch deployment

Significantly reduce deployment time and costs while giving users fast and secure access to their devices with Windows Autopilot.

### Efficient updates

Windows 11 devices stay up to date with Windows Updates for Business, Microsoft Endpoint Configuration Manager and Endpoint Analytics. It also saves network bandwidth with 40% smaller updates.

# Intelligent features for enhanced collaboration

Windows® 11 was designed with the future of work in mind. That's why it integrates capabilities designed to improve team collaboration from anywhere in the world. Key collaboration features include:

The **simplified interface** improves your focus with a more direct, intuitive experience and effortless navigation.

- Start menu app folders
- Personalized file explorer
- Start screen, taskbar and navigation center refresh

**Smarter video conferencing** makes online meetings more effective.

On supported devices, AI enhances videoconferencing by adapting to ambient noise and movement to eliminate background distractions.

- Voice focus
- Eye contact
- Automatic framing
- Noise cancellation
- Background blur

**Contextual suggestions** make everyday tasks easier with recommendations that simplify workflows.

- Smart recommendations for tasks and content
- Smart Search

**More accessibility features** ensure more inclusive experiences for people with diverse abilities and workstyles.

- Live captions
- Voice access
- Improved focus assist

**Easily integrate** Windows 11 with other Microsoft® products, including Microsoft Teams, Azure, Active Directory, Power Automate and more.

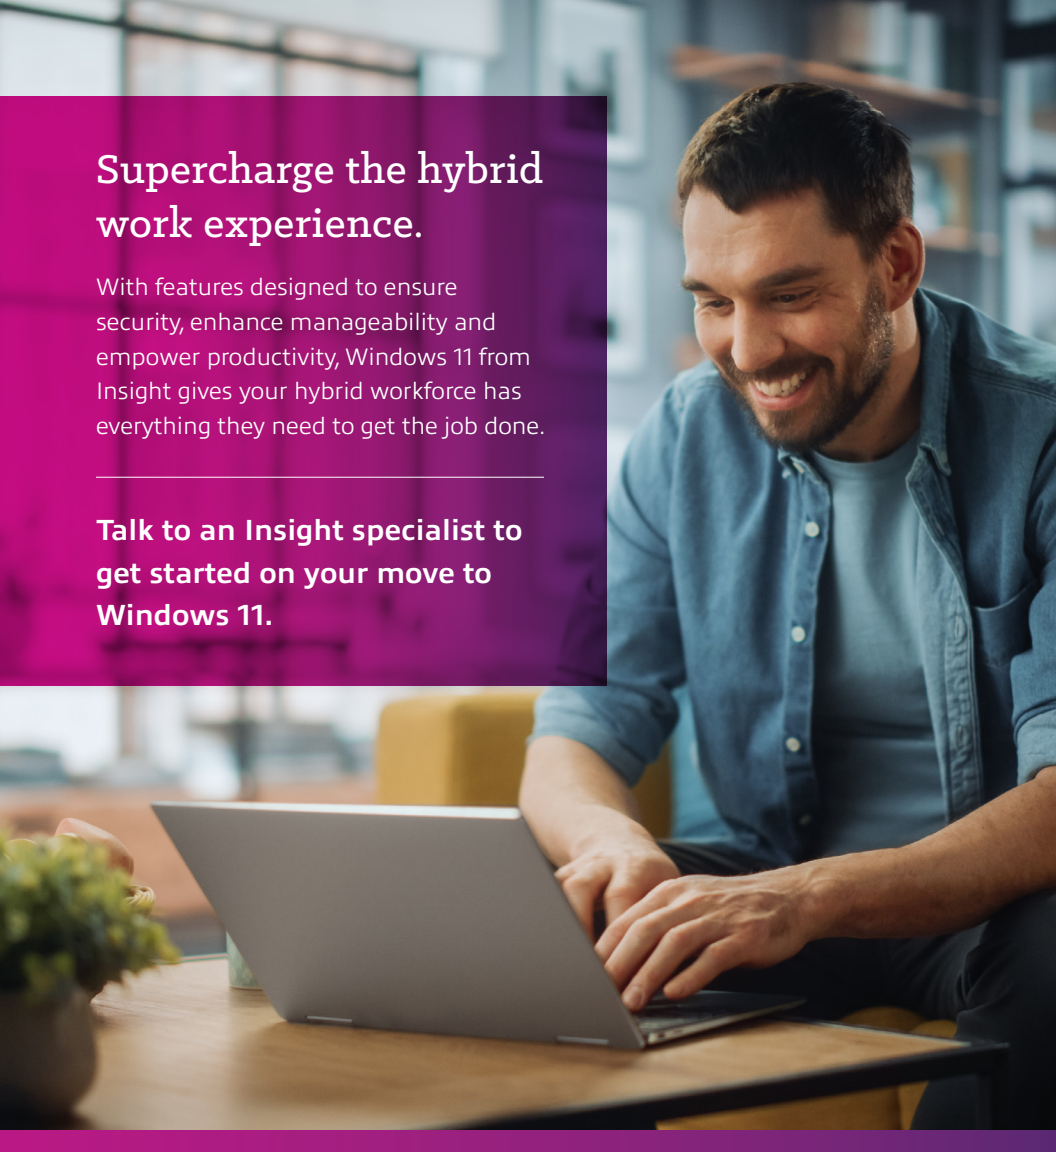

## Supercharge the hybrid work experience.

With features designed to ensure security, enhance manageability and empower productivity, Windows 11 from Insight gives your hybrid workforce has everything they need to get the job done.
