

# Windows 11 Pro Devices

Advanced security from chip to cloud

## Why Insight for Windows 11 Pro Devices?

As a global systems integrator, Insight helps you maximize control of your fleet of devices to optimize costs and performance outcomes. We bring expertise, resources and support to each phase of the device lifecycle so you can stay focused on your business.

Insight's Managed Security Services (MSS) protect against threats and prepare you for future security risks. We provide highly scalable, fully orchestrated security services 24/7/365 from support centers around the globe.

MSS offers a variety of benefits, including:

- Advanced analytics for 24/7 visibility, detection and response
- Rapid remote incident responses and escalations
- Reduced dwell times from industry average to minutes
- Global threat hunting and research capabilities
- Applied threat intelligence, incident investigation and analysis
- Decreased operational burdens and costs

## Security at every level

With Windows® 11 Pro, hardware and software work together to keep your information, identity and data secure from the chip to the cloud. Windows 11 Pro raises the security baseline with new features built into the operating system and hardware. By delivering advanced protection for the hybrid workforce, it lets your teams be productive from anywhere without compromising security.

## Windows 11 security priorities

Windows 11 Pro builds upon the existing Windows foundation with new security requirements that boost resiliency and protection for your hybrid workforce, including:

Enhanced hardware and operating system security

Robust application security and privacy controls

Secured identities

Connecting to cloud services

## An enduring partnership

Insight helps you deliver meaningful outcomes with Microsoft.

- 30+ year partnership
- Microsoft's largest global reseller
- Devices sourced to 49 countries in 14 currencies

## Our partner

# Zero Trust protection

Windows 11 Pro relies on a three-pronged approach to Zero Trust principles: First, it **verifies explicitly**, meaning it always authenticates and authorizes data points. Second, it **uses least privileged access** to limit user access based on possible risks. Finally, it **assumes breach** to minimize potential attacks.

# Modernize security with Insight.

Insight offers a variety of services to help you evaluate, prepare and integrate Windows® 11 Pro into your existing environment.
