

# — Empower Your Data With Quest

A sustainable foundation  
to maximize the impact of  
your data

Insight  Quest

A woman in a light blue blouse and dark skirt stands with her back to the camera, looking at a laptop held by a man in a dark blue jacket and dark pants. They are in a server room with rows of server racks in the background. The lighting is cool and blue-toned. A dark grey semi-transparent box is overlaid on the left side of the image, containing white text. A small pink horizontal bar is at the top left of the text box.

Your business environment demands a data center and partner that can handle massive amounts of data. Quest® solutions, available from Insight, support IT databases for on-premises, cloud and hybrid infrastructures. Quest simplifies and automates IT management to ensure your teams can focus on growth.

In this ebook, you'll discover the Quest portfolio of products and services for data operations, data protection and data intelligence.

# Data operations

Data operations are crucial to enhancing the performance and value of your enterprise data. Quest data operations solutions empower organizations with:

- Modern, flexible, scalable data infrastructure, including successful support of cloud and hybrid environments
- Data pipeline visibility/availability and uninterrupted flow
- Proactive identification and resolution of performance issues
- Highly-skilled IT staff armed with strategic expertise (data experts, not just database experts)
- Self-service data preparation and access
- Greater agility/productivity, faster delivery of mission-critical applications

## Data operations solutions

Database development and management are critical to your business. Take a look at Quest's data operations portfolio, including:

- Toad
- ApexSQL
- Foglight
- Spotlight
- erwin Data Modeler
- Toad Data Point
- SharePlex

# Data protection

Data protection is critical to businesses. It ensures data privacy requirements are met and network-connected devices are secure. Quest helps secure your data with:

- Offensive and defensive methodologies and technologies
- Visibility of data infrastructure and assets to identify data locations and endpoints that require protection
- Secure data infrastructure to prevent unauthorized access
- High performance backup, recovery and data deduplication, which minimizes data loss, maximizes system availability and reduces storage costs
- Data compression and encryption to fortify the network, including external storage, for regulatory compliance

## Data protection solutions

Quest data protection solutions keep your data secure and manageable with a powerful portfolio of products, including:

- KACE
- QoreStor
- NetVault
- Rapid Recovery
- SharePlex
- LiteSpeed
- ApexSQL
- Toad Sensitive Data Protection

# Data intelligence

Quest provides data intelligence solutions to help your business establish a sound, flexible framework for awareness and access to your data. These solutions can be leveraged as guidance to ensure data policies and best practices are followed. Quest data intelligence solutions enable your business to:

- Use metadata-driven automation to identify and harvest technical assets, including data provenance, lineage and impact analysis
- Curate these assets with business and quality context
- Govern asset use across the organization with the association of business rules and policies
- Enable enterprise-wide socialization of available, high-quality assets for knowledge-sharing and use
- Manage change and innovation through enterprise architecture
- Understand business processes/workflows and inputs/outputs to uncover risks and areas for improvement

## Data intelligence solutions

Quest data intelligence solutions provide the power to catalog, analyze and process powerful business data. The portfolio of solutions include:

- erwin Data Intelligence
- erwin Evolve
